

Potato Chip Block

“Bet you can’t make just one!”

1. Take the 1 piece of fabric from the “Quilter’s Booty” and make a block that measures $2\frac{1}{2} \times 4\frac{1}{2}$.
 - You could cut your ‘Booty Piece” $2\frac{1}{2} \times 2\frac{1}{2}$ and then add a another $2\frac{1}{2} \times 2\frac{1}{2}$ piece to make a piece $2\frac{1}{2} \times 4\frac{1}{2}$.
 - You could cut your ‘Booty Piece” $2\frac{1}{2} \times 3$ and then add a another $2\frac{1}{2} \times 2$ piece to make a piece $2\frac{1}{2} \times 4\frac{1}{2}$.
 - You could cut your ‘Booty Piece” $2\frac{1}{2} \times 3\frac{1}{2}$ and then add a another $2\frac{1}{2} \times 1\frac{1}{2}$ piece to make a piece $2\frac{1}{2} \times 4\frac{1}{2}$.
2. Take the other piece from your “Quilter’s Booty” and complete step 1 above for it.
3. Sew the 2 pieces you created together long sides together. Steps 1 and 2 below.
4. Cut/create 16 more $2\frac{1}{2} \times 4\frac{1}{2}$ blocks.
5. Take 2 more blocks and turn them sideways and sew to the top and bottom of the block created in 3 above. Steps 3 and 4 below.
6. Take 2 more blocks and sew them short side together. This becomes block 5/6. Repeat for blocks 7, 8. Using the diagram below, add blocks 5/6 and 7/8 to the block created in step 5.
7. Follow the diagram below to finish the block – steps 9 -18.
8. Your finished block should resemble the diagram below and should measure 12.5×12.5 unfinished and 12×12 finished.
9. You have created one “Potato Chip Block”. Can you stop at just one?
10. Bring your finished blocks to the meeting next month and we will put them together for hospice quilts.
